

Elis Joshua Rouen Vicente Tatoy

Frontend Developer

+ (65) 9641 4595 | owentatoy@gmail.com | [LinkedIn](#) | [Portfolio](#)

Summary

Frontend Developer with 3 years of experience delivering enterprise and public-sector applications. Specialist in Angular with expanding proficiency in React, I contribute to responsive, maintainable frontend systems with a focus on UI consistency, performance, and code quality in complex, large-scale environments. I am highly adaptable to any environment and am dedicated to learning new things for my own growth and development, all while helping the organization grow.

Skills

Programming Languages: JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks and Libraries: Angular, React, NodeJS, ExpressJS, NgRx, RxJS, jQuery, Tailwind CSS, Bootstrap

Tools & Platforms: Git, Azure DevOps, AWS, Postman, Figma, Jira

Education

University of Wollongong, Australia
Bachelor of Business Information Systems (Grad. 2020)

Certifications

ICT Assessment Certification for Software Developers
NUS-ISS

Interests

Hiking, Long walks, Gaming, Anime, Football, Board games

Work History

Accenture Pte Ltd (2023 - Present)

Role: Frontend Developer

Client: Inland Revenue Authority of Singapore (2025 - Present)

- Developed IRAS e-services and internal modules using Angular, SASS, NgRx, and RxJS, specifically engineering core Property Tax features such as RFI and Valuation modules to streamline taxpayer workflows.
- Supported the Entity Management domain for national tax platforms, resolving production incidents and service requests to ensure the integrity of core taxpayer profile data and cross-functional system modules.
- Maintained high code quality by leveraging Jasmine and Karma to uphold code standards and system integrity.
- Collaborated with backend services powered by MS SQL Server, ensuring seamless data integration and performance via RESTful APIs.
- Maintained existing features through incident resolution, system enhancements and service requests.
- Achieved 100% WCAG 2.1 compliance by conducting comprehensive accessibility scans and resolving all critical and major UI barriers.
- Collaborated with the Design System team to enhance shared component libraries and implement critical security updates, ensuring UI consistency and compliance across domain teams.
- Managed the end-to-end release lifecycle across SIT, UAT, and ORT environments, utilizing Azure DevOps to maintain rigorous traceability and documented validation for all production-bound features.

Client: Central Provident Fund (2023 - 2025)

- Developed and maintained both citizen-facing web e-services (Vanilla JavaScript with AEM) and Angular-based internal administrative platforms supporting Medisave cash top-up workflows, including case and form management.
- Independently researched and delivered a React + Tailwind CSS workflow proof of concept to demonstrate scalable, modular UI architecture.
- Contributed to peer code reviews and Git-based version control practices to uphold code quality, consistency, and team standards.

Nalagenetics Pte Ltd (2021 - 2023)

Role: Software Engineer (2022 - 2023)

- Developed and maintained genetics interpretation software using Angular and SASS, integrating backend APIs to facilitate internal data processing and genetic sample analysis.
- Developed and optimized the company's public marketing website, applying SEO best practices to improve visibility and performance.
- Collaborated with designers using Figma to translate UI prototypes into production-ready interfaces.
- Conducted peer code reviews to improve code quality and reduce defects prior to QA testing.
- Worked closely with QA and product teams to identify, debug, and resolve functional issues.

Role: IT Support Engineer (2021 - 2022)

- Managed AWS EC2 and S3 environments to support cloud infrastructure and secure storage services.
- Maintained virtual and physical asset inventories, ensuring compliance with internal security standards.
- Built and managed an internal IT Helpdesk portal using Jira to streamline IT service requests and tracking.
- Handled user onboarding and offboarding through JumpCloud, managing access control and device policies.
- Supported ISO 27001 (Information Security Management) compliance by maintaining security policies and internal documentation.

Geodis Singapore Pte Ltd (2020 - 2021)

Role: Regional IT Project Specialist

- Worked with Software Applications, IT Infrastructure, and IT Service Management teams on APAC-level initiatives.
- Supported an ITSM continuous service improvement project, collaborating with country IT managers to improve efficiency, cost control, and resolution times.
- Assisted in demand management initiatives and server/PC migration projects.
- Supported the CIO with project tracking, status reporting, and resource alignment.
