

Joshua Vicente

Frontend Developer

+ (65) 9641 4595 | owentatoy@gmail.com | linkedin.com/in/joshua-vicente/

Summary

Frontend Developer with 3 years of experience delivering enterprise and public-sector web applications, specialising in Angular with growing experience in React.

Skilled in building responsive and maintainable frontend systems within structured environments, with a strong focus on clean UI design, performance, and code quality.

Motivated to continuously improve and contribute effectively to team outcomes and organisational goals.

Skills

Programming Languages:

JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks and Libraries:

Angular, React, NodeJS, ExpressJS, NgRx, RxJS, Tailwind CSS, Bootstrap

Tools & Platforms: Git, Azure DevOps, AWS, Postman, Figma, Jira

Education

University of Wollongong Australia

Bachelor of Business Information Systems (Graduated 2020)

Kaplan Higher Education

Diploma in Information Technology (Graduated 2014)

Work History

Frontend Developer - Accenture Pte Ltd (2023 - Present)

Key Focus: Angular, React, Vanilla JavaScript, RxJS, NgRx, Tailwind CSS, Agile

Client: Inland Revenue Authority of Singapore (2025 - Present)

- Developed internal and public e-services using Angular, contributing to IRAS systems that enable officers to perform capital and rental property valuations.
- Built an RFI (Request for Information) system enabling IRAS officers to securely request and manage taxpayer property information.
- Supported production systems as part of a maintenance team, handling change requests, production incidents, and functional queries raised by IRAS officers.
- Worked within controlled enterprise release processes (DEV, SIT, UAT, ORT, PROD), including formal approvals, documentation, and RCA submissions prior to deployment.
- Developed unit tests using Jasmine to ensure frontend stability during enhancements and fixes.
- Monitored CI/CD pipelines and security scans (e.g. Fortify SCA, Mend, SonarQube), coordinating with platform teams to resolve build and compliance issues.
- Collaborated with the central UI (Team 0) team to enhance shared IRAS UI component libraries, manage version upgrades, and prevent breaking changes across domain teams.

Client: Central Provident Fund (2023 - 2025)

- Developed public web e-services using Vanilla JavaScript integrated with Adobe Experience Manager (AEM) components, supporting CPF Medisave cash top-ups for self and family members.
- Built and maintained internal admin platforms for managing citizen-submitted cases and forms generated from CPF web e-services using Angular.
- Developed a workflow POC by researching and implementing React and Tailwind CSS (including TanStack Router and TanStack Table) to deliver functional end-to-end UI flows.
- Participated in peer code reviews and Git-based version control to maintain code quality and team standards.

Software Engineer - Nalagenetics Pte Ltd (2022 - 2023)

Key Focus: Angular, Bootstrap, NgRx, RxJS, Agile

- Built and maintained genetics interpretation software using Angular, supporting internal workflows for processing and analysing genetic samples.
- Developed and optimized the company's public marketing website, applying SEO best practices to improve visibility and performance.
- Implemented frontend features using Angular (TypeScript, HTML, SCSS), integrating with backend APIs for data-driven workflows.
- Collaborated with designers using Figma to translate UI prototypes into production-ready interfaces.
- Conducted peer code reviews to improve code quality and reduce defects prior to QA testing.
- Worked closely with QA and product teams to identify, debug, and resolve functional issues.

Certifications

**ICT Assessment Certifications
for Software Developers**
NUS-ISS

IT Support Engineer - Nalagenetics Pte Ltd (2021 - 2022)

Key Focus: AWS, ISO 27001, JIRA, JumpCloud, IT Solutioning

- Managed AWS EC2 and S3 environments to support cloud infrastructure and secure storage services.
- Maintained virtual and physical asset inventories, ensuring compliance with internal security standards.
- Built and managed an internal IT Helpdesk portal using Jira to streamline IT service requests and tracking.
- Handled user onboarding and offboarding through JumpCloud, managing access control and device policies.
- Supported ISO 27001 (Information Security Management) compliance by maintaining security policies and internal documentation.

Regional IT Project Specialist - Geodis Singapore Pte Ltd (2021 - 2022)

Key Focus: IT Service Management, IT Project Management

- Worked with Software Applications, IT Infrastructure, and IT Service Management teams on APAC-level initiatives.
- Supported an ITSM continuous service improvement project, collaborating with country IT managers to improve efficiency, cost control, and resolution times.
- Assisted in demand management initiatives and server/PC migration projects.
- Supported the CIO with project tracking, status reporting, and resource alignment.
